

# innovaphone – The New Dimension of Working

English

communicate. connect. collaborate.

# Your Specialist for IP Communication

innovaphone is one of the leading European providers of universal work and communications solutions for companies of all sizes. innovaphone offers the suitable solution for small and medium-sized businesses with several different branches as well as for large enterprises.

To this day, the owner-managed company is financed entirely with private funds and stands for continuity and sustainable value as well as for strong development performance. All innovaphone hardware and software solutions are developed in-house by engineers and software specialists and produced in Europe. innovaphone currently employs more than 100 people at its headquarters in Sindelfingen, at other locations in Germany and at three foreign subsidiaries in France, Austria and Italy.

- **Reliability** – we are an owner-managed company: there is no interference from investors
- **Collaboration** – we emphasize team work
- **Frankness** – our doors are always open and everybody is welcome
- **Internationality** – our employees represent more than 12 countries and speak more than 10 different languages
- **Target orientation** – we aim at natural and organic growth to achieve success

# Why Switch to IP Telephony?

A reliable telephone system is indispensable for successful and efficient business communication.

Our innovaphone PBX IP telephone system includes the myApps platform and is suitable for any company size and business structure such as for small offices, medium-sized businesses and large enterprises with many different sites. Due to the unique modularity and the variety of functions, hardware platforms, end devices and software solutions, all individual requirements placed on the system will be entirely met. Full performance is achieved when combined with the Unified Communications functionalities of the innovaphone myApps platform. This complete solution with the full set of features is available either on premises or in the cloud.

# Why do You Need Unified Communications?

Gone are the days of "only making phone calls". Today, you do not only reach for the handset but also make use of the most diverse ways and means to connect with others and to exchange information. An integrated communication structure is therefore essential.

With the communication platform innovaphone myApps, you will receive everything in one system: versatile telephony functions as well as a complete Unified Communications solution. Video, Presence, Chat, Office and Mobile Integration in addition to Application Sharing and Conferencing turn the innovaphone PBX IP telephone system into the mature yet still lean myApps all-in-one communication solution. This complete solution with the full set of features is available either on premises or in the cloud. Get the perfect solution for your business communication.
