Unleash the Power of Seamless Collaboration

Zimbra is a collaboration solution that lets you communicate, organize and secure your data. Its productivity suite of tools include email, contacts, calendar, file storage, tasks, chat and video applications.

With a modern user interface, Zimbra is easy to use and accessible anytime, anywhere.

Zimbra is built with security and reliability at its core - necessary to keep sensitive information, identities, applications and devices safe. Zimbra's dependable server infrastructure also provides the privacy and data sovereignty Zimbra customers have come to expect, and in many cases, require.

Rich and Consistent User Experience

Available on all major platforms (Windows, Mac, Linux), Zimbra is accessible through web browsers, its native Zimbra Desktop client, and many third-party desktop email clients, such as Outlook, Mac Mail, Thunderbird, etc.

Zimbra's easy-to-use interface is consistently experienced across collaboration tools, sophisticated mail filters and powerful search for large inboxes, calendars and attachments. Making it easy for end-users to adopt, this reduces support costs and user training needs.

Agnostic Deployment

Deploy on-premises in your own data center, in a public or private cloud, or connect with a Zimbra Hosting Partner for a fully managed Zimbra SaaS service. These flexible deployment options support your data sovereignty requirements and satisfy privacy needs.

Easy Administration and Maintenance

A web-based administration console means your IT admins can securely access the application anywhere, anytime. Through the console, administrators can easily manage access and policies for diverse users in a large organization. Administration is also available via CLI.

End-user self-service administration is fully achievable. reducing IT administration and support overhead and increasing end-user satisfaction.

Enhanced Security Features

Zimbra provides out-of-the-box functionality for two-factor authentication, email encryption, secure comms via TLS, HTTPs and more. Zimbra is also easy to integrate with third-party security apps.

Main security features

- Two-Factor Authentication (2FA)
- Mobile Device Security
- Allow/Block/Quarantine (ABG)
- Postscreen for Zimbra MTA
- S/MIME Digital Signatures & Encryption

Integration with Business-Critical Applications

Zimbra is a powerful and versatile collaboration solution that can help your organization to be more productive and efficient. It is easy to use, secure, and scalable, and it can be deployed in a variety of ways to meet your specific needs.

Integrate with your existing business applications using Zimbra's open APIs and Zimlets. Zimlets are a mash up of additional features and applications that work seamlessly with Zimbra.

Zimbra Chat & Video

Zimbra Chat & Video unites all your co-workers, group content and resources. Zimbra Chat & Video is free of plugins and installations, so the user experience is as frictionless as possible.

Office: Briefcase & Document Editing

Create and edit Office documents in real time right from within your browser. Invite contributors to edit and review the same document simultaneously. It is fully compatible with Microsoft Office documents (docx.xlsx, pptx) and supports other popular open formats, such as odt, ods and odp.

Mobile Sync

Zimbra Mobile implements the Exchange ActiveSync protocol, which is natively supported by most mobile devices. Your data will always be at your fingertips, without any middleware or dedicated client. Zimbra email, calendar, contacts and tasks data is bi-directionally synchronized to the native applications on compatible iOS and Android phones and tablets.

Key Benefits

- **Seamless collaboration.** A single platform for all of your collaboration needs

- **Easy to use**. For both end-users and administrators. Plenty of self-service options available

- **Secure**. Zimbra is built with security and reliability at its core. It includes a number of security features, such as two-factor authentication, mobile device security, and postscreen for Zimbra MTA

- **Scalable.** Scaled to meet the needs of any organization, from small businesses to large enterprises

- **Open core**. Zimbra is built on open-source technology, which means that it is customizable and extensible

If you are looking for a powerful and versatile collaboration solution, Zimbra is a great option. It is easy to use, secure, scalable and customizable.
